Cancellation Rate by Super Region

Business Insights & Strategic Recommendations

Platform Performance Risk

Desktop platform contributes the highest cancellation volume and revenue leakage, indicating potential friction in booking flow or customer experience.

Recommendation: Optimize desktop booking journey, improve payment stability, and monitor customer drop-off points.

High-Value Booking Risk

Mobile App users generate fewer cancellations but significantly higher revenue impact per cancellation, suggesting premium customer concentration.

Recommendation: Introduce retention workflows and booking confirmation reminders for high-value app users.

Revenue Leakage Hotspots

Specific source and destination cities like agra, guwahati, bengaluru, surat and vishakhapatnam consistently contribute higher cancellation-driven revenue losses.

Recommendation: Strengthen operational monitoring and vendor coordination in high-risk city clusters.

Operational Trend Stability

Cancellation rates remain relatively stable despite fluctuations in booking volumes across various months.

Recommendation: Maintain current operational controls while focusing on improving conversion efficiency.

Business Insights & Strategic Recommendations

Car Segment Contribution

Crysta category contributes the highest share of overall revenue, indicating strong customer preference for premium travel options.

Recommendation: Increase premium fleet availability and strengthen premium customer retention strategies.

Growth Opportunity

Mobile channels demonstrate strong booking contribution and operational scalability compared to desktop.

Recommendation: Focus future growth initiatives on app engagement and mobile-first customer acquisition.

Seasonal Trends

February , May , September and Decembers are the most demanding months for the Outside trips , so Most of the revenue increments Occur in these Months.

Recommendation: March, april ,July and August are the most slow months in our market, so these months are to be considered in our Advertising Campaigns.
